

Economical transportation-use flexitanks for your liquid cargo

Stella Naves introduces to the Finnish market Braid Logistics flexitanks. The flexitank is an excellent substitute for tank containers, as for its transportation is used regular sea containers.

Shipping your liquid cargo in flexitanks provides you a better economical solution for your transport!

Braid Logistics is one of the world's leading flexitank operator. With its 40% global market share, and an unblemished incident record, the company is able to handle over 6000 movements per month worldwide with a capacity from 12000 to 24000 litres. Own production plants and 24/7 supervision provides customers safety and high standard values.

ROI when using flexitanks:

- » **Saving costs:** tank container vs regular sea container
- » **Environmentally friendly:** manufactured from recycled materials
- » **Single trip & Disposable:** guarantee for cleanness
- » **Foodgrade quality:** transport of wines, water and other liquids for consumption
- » **Lightweight & User friendly**

Contact us and we advice you further on your request by using flexitanks!
